

THE NO NUMBERS MONEY TALK

PRESENTED BY
LEGACY CAPITALS

This don't-miss webinar will provide the Leading Generation (aka Parents and Grandparents) with wisdom and practical tools to help foster successful discussions around their family resources that don't require discussion of the numbers. Participants will learn how to use three tools to aid in their conversations around topics like philanthropy, what happens in case of an emergency (ICE), and communicating their legacy. These types of discussions are a wonderful opportunity to spend time with family and share values, priorities, and strengthen relationships.

*Having the money conversations with your family **WITHOUT** using numbers? It is easier than it sounds when you have the right tools.*

As a result, participants will...

- Understand how to talk about their wealth, without referring to dollars and cents.
- Gain practical tools to prepare their next generation regarding their values and valuables.
- Will be ready to have meaningful conversations with their family.
